DID YOU KNOW?

That there people buy and what they buy depend upon the advertisements they read?

That a business concern that wishes to attract business must make itself attractive to those who have money to spend? No public exists in the minds of the public unless it is constantly telling them what they have for sale.

That it is always best to carry well advertised lines in stock and advertise that fact loudly?

That persistent advertising maintains present business and assures future business?

That well advertised merchandise is better for use; therefore, better to sell or buy?

That business concerns are judged to a great extent by the merchandise they offer for sale?

The thaw last week took off a lot of the snow and left the roads and sidewalks very icy when the weather grew cooler. It made the auto slow and skid and one coming around the corner by Gammon & Martin's store, Monday, about noon, struck his gasoline pump and broke it off close to the ground, causing a short circuit in the electric line which attached which set fire to the gasoline as it poured out and ran down the sidewalk past the store to the next house. The auto was pulled off from it and the chemical engine brought to the scene and saved the tank from blowing up. It all happened so quickly that there was no time for the fire alarm to be sounded and but few knew of the great danger the village had escaped until afterwards. It was a Gulf gasoline tank and the man driving the offending auto was a traveling insurance agent, by the name of Chapman, from Portland.
